Professional Training In Commercial Shipping

Course Objective

The shipping industry offers you one of the most diverse and exciting career paths within industries today. The global marketplace has expanded tremendously. International economies depend upon shipping for sustainability and growth. As international trade increases worldwide, so does the demand for shipping, and along with it, increased opportunities to enter this exciting field. This means that you will have an easy time finding employment in the shipping industry. Finding your niche, though, requires careful planning, research, proper education and training, determination and flexibility, student will want to explore a land-based career in the shipping industry. But don't think that you are giving up excitement or versatility by working on land. The on-shore aspect of the shipping industry is fast-paced, intensive, multi-faceted and always busy. In fact, a career in shipping is 24/7, since the ships trade worldwide and need constant management and monitoring. But since the industry is so broad and global, student can transfer virtually any educational degree, along with a professional qualification in commercial shipping into a successful career on shore for one of many large and small shipping companies.

Career Prospects

Ports are busy and dynamic and can be as exciting as being on the vessels at sea. A wide variety of shipping vessels, cargo, personnel and government officials move in and out of the ports. Additionally, one has to track, monitor and comply with a myriad of international and domestic port regulations. Careers at port include: passenger and cargo loading, unloading, and distribution, and port security. This includes such positions as: longshoreman, truck and ship loaders, transportation manager, shipping broker, cargo and freight agent, marine engineer, chartering manager, and fleet engineer. A shipping broker position, for instance, will keep you on your edge. To be successful, you must be able to correctly assess current market conditions and predict the future of supply and demand for your company's cargo. Your analyses can make or break the company—excitement for sure! Crossover positions are for those who love the field of International Shipping however, prefer not to spend time on the seas or at port, but instead to work with the many resource services that interact with International Shipping companies on a daily basis.
