Professional Training In Logistics

Course Objective

Logistics & Supply Chain Management is considered as one of the most powerful source of competitive advantage in recent times. It attempts to enhance the traditional management by focusing on the organization and integration amongst the various partners of supply chain for better management and thus providing greater value to the consumer.

Students will develop and learn to apply analytical tools & approaches in the operation of logistics and supply chains systems along with designing and setting up a warehousing facility. This course will also teach students about developing logistics networks in order to minimize costs and deliver best customer service. The challenge with globalization is that time and distance are added to supply chains resulting in increased cost, complexity and risk. This can also become an opportunity. Successfully handling the complexities and risks provides a competitive edge and sets you or your organization above the rest.

Career Prospects

SKILLS 2 CAREER certified Logistics and Supply Chain Management professionals find employment in various transportation, warehousing, distribution and shipping conglomerates. This course provides the foundational skills for supply chain management & global logistics industry. Excellent supply chain management is essential for businesses to be successful. According to various HR studies Supply Chain Management positions will grow at nearly 270,000 opportunities per year there is greater demand for Supply Chain professionals than supply. There are exciting career opportunities as a Logistics Manager, Supply Chain Analyst, Purchasing Manager.
